

We Protect the World's Oil Supply

Well, a portion of it, with pipeline supports that prevent temperature migration. Also, gaskets that protect against:

- 1) Cathodic corrosion; and
- 2) Expansion/contraction due to temperature.

Our thermoset composites provide insulation down to cryogenic temperatures, and protect against the most corrosive elements that nature can devise.

Put the strength of Norplex-Micarta behind you.

For more information on our high-strength products for midstream Oil & Gas applications, *contact us today* at info@norplex-micarta.com, or 800-350-9490.
