Headlines: Norplex-Micarta Invests in Tubing Facility Upgrades

We recently made numerous upgrades and process improvements to our convolute tubing manufacturing facilities. Upgrades to our tube winding and grinding equipment, combined with a streamlined manufacturing process, have reduced lead times and production costs. [Click here](#) for more details on these improvements. As always, please let us know if you have any suggestions on how we can further improve our products and services to meet your needs: 800-350-9490 or info@norplex-micarta.com.

In the News: StormBlocker™ Shelter Systems

Norplex-Micarta has partnered with Omnitek Products, Inc. to develop the StormBlocker™ shelter system for protection against the devastating effects of tornadoes, hurricanes, and severe wind events. The above-ground system surpasses even the most rigorous Federal Emergency Management Agency (FEMA) and National Storm Shelter Association (NSSA) guidelines. [Click here](#) for more information.

Proven in the Field: Ripple Springs for Power Generators

Norplex-Micarta manufactures a complete line of fiberglass epoxy ripple spring materials for power generators. This material is a very thin, but extremely strong, molded pre-preg composite that stabilizes and protects the contents of an armature against extreme magnetic field forces in the generator. [Click here](#) for more details.

Spotlight on Technology: High-Temperature NP571HT

The NP571HT provides superior mechanical strength at continuous temperatures of up to 210°C. Its high-temperature characteristics make the NP571HT ideal for numerous uses in power generation, oil & gas, and aerospace applications. [Click here](#) for more information.

StormBlocker™ is a trademark of Norplex-Micarta.
