Headlines: Counter Plates Enable Precise Production Tolerances

Norplex-Micarta announces MC704, a new counter plate material used in precision creasing of paper sheets and cardboard. This new material provides strength and durability, thereby minimizing production downtime. For more information, please visit our "What's New" page and click on "[Counter Plates](#)."

In the News: "Complex Composites Solve Problems"

Norplex-Micarta recently published an article in the March issue of *Advanced Materials & Processes* on the use of complex composites. These specialty composites are custom designed by combining a composite with two or more different substrates, resin systems, or non-composite materials. To read the full text of the article, please visit our "What's New" page and click on "[Complex Composites](#)."

Proven in the Field: "Thermosets Take the Heat in Missile Propulsion Systems"

Norplex-Micarta recently published an article in the March issue of *Reinforced Plastics* on the use of a fabricated thermoset composite component to solve a design deficiency in U.S. military tactical missiles. To read the full text of the article, please visit our "What's New" page and click on "[Missile Stabilizer](#)."

Spotlight on Technology: NP613 Provides Strength and Insulation in Power Transformers

NP613 provides superior structural strength and electrical insulation in transformer applications. For more information, please visit our "What's New" page and click on "[NP613](#)."

Upcoming Events: SAMPE 2006

Norplex-Micarta will be exhibiting at SAMPE 2006 in Long Beach, CA on April 30 – May 4. Visit us at our booth [#724](#) for the latest in Norplex-Micarta product technology and solutions.
