#### HEADLINES:

##### “Glass Epoxy Composite has the Right Stuff for Vital Space Mission”

Norplex-Micarta recently published an application article in the March issue of *Reinforced Plastics* on the use of their glass epoxy resin in NASA space observatories. [Click here](#) to read the full text of the article beginning on page 52.

#### IN THE NEWS:

##### “Beating the Heat with Lubricant Enhanced Compressor Vane Material”

Norplex-Micarta has also published an article in the April issue of *Composites Technology* about their friction reducing vane material. This material features a proprietary lubricating additive that significantly lowers operating temperatures in vacuum pumps and rotary vane compressors, extending equipment life and slashing downtime. [Click here](#) to read the full text of the article.

#### PROVEN IN THE FIELD:

##### “Home Buyers, Builders Benefit from Composite-Based Storm Shelters”

The benefits of using *StormBlocker*™ composite-based material in home storm shelters are discussed in the recent April/May issue of *The IAPD*. [Click here](#) to read the full text of the article.

#### SPOTLIGHT ON TECHNOLOGY:

##### RT511 Tubing Offers High-Temperature Electrical Insulation

Norplex-Micarta recently announced RT511 tubing, known for its superior wall bond strength. This wound tubing glass epoxy resin system maintains its strength at temperatures up to 150°C and provides excellent electrical insulation. [Click here](#) for more information.

You have received this email because you are a Norplex-Micarta contact. We hope this information is useful to you, but if you would prefer not to receive email correspondence from us in the future, please [click here](#).
